Hi Teresa,

I know you are still out but I wanted to go ahead and get this to you as we have potential end-users chomping at the bit for this one. I have attached a track changes copy of the post-IIa review (NCEA-IO clearance version). I have provided responses to the three brief comments she provided. No changes or edits needed for comments 1 and 3 but I left in a flag for STSC on a rather simple matter (comment bubble 2 re: student t-test) but wanted them to check so that we are consistent with presentation in other assessments. Otherwise this one is ready to process for Final/posting. Let me know if any questions. Thank you Teresa
